

RTT Longreach - belt loader extension

APPLICATION

- Adaptable to multiple belt loader types

DESIGN

- Extension of belt loader
- Moving belt with end platform
- Lifts cargo / baggage onto platform at convenient height
- Height and position adjustable end platform
- Bolts on to any belt loader
- Electrically powered thru belt loader
- Also used in terminals for ULD and trolley loading / unloading

FEATURES

- Handling can be moved further in to the aircraft to avoid loader has to sit under the door (B737)
- Standard belt loader can be parked at a safe distance further away from the aircraft, reduces damages to aircraft fuselage
- Reduces heavy lift dramatically (75-80% less)
- Eliminates need of lifting heavy items from floor level
- Faster and easier loading / unloading
- Possibility to use belt loader for smaller a/c types, even though there is limited space nearby aircraft engines
- Manpower savings compared to a/c without baggage loading system

AVAILABILITY

- Leadtime 3 months
- On-site support during first delivery
