Next Generation AKE / LD3 Container

APPLICATION

- All Wide Body Aircraft - Lower Deck

DESIGN

- Robust construction by design
- No rivets between panels and frame
- Highly impact resistant panels
- Panel material resistant to cuts
- Stiff hybrid base plate (3 x aluminum)
- Elimination of vertical door post
- Meets latest flammability requirements
- All metal items fully corrosion protected

FEATURES

- Increased durability of composite ULD's
- Longer in-service life
- Reduced weight
 - 47 - 51 kg (104 lbs) pending on options
 - Up to 43% less weight compared to all aluminum ULD's
- Improved loading conditions for baggage handlers
- Improved load ability in robotic load cells
- Ease of maintenance and repair
- Less wear and tear to cargo system
- RFID traceability and ULD temperature warning option
- Flat packed for local assembly

AVAILABILITY

- In production
- STC certified
- Exceeding TSO C90c specification
